

VALERIA

CHERNYAVSKAYA

WEB DEVELOPER

ABOUT ME

Date of Birth: June 14, 1996

I am a web developer with two years of experience creating websites on freelance platforms. I have solid skills in HTML, CSS, and JavaScript. I specialize in end-to-end website development, including domain and hosting acquisition, integrating layouts into WordPress (and other CMS platforms), and working with PHP hooks, which allows clients to easily update their website content without any coding knowledge.

I have learned these technologies independently, without relying on paid IT courses, and I am committed to continuous professional growth in frontend development. Currently, I am looking for opportunities to work in a team where I can share my knowledge and experience while also learning from my colleagues and participating in exciting projects.

My Skills:

- **HTML and CSS:** Proficient in semantic HTML and BEM methodology, ensuring clean, maintainable code. This enhances readability, simplifies updates, speeds up site loading, and improves SEO optimization.
- **JavaScript:** Basic knowledge of JavaScript, working with the DOM, and creating interactive elements to enhance user experience.
- **Responsive and Cross-Browser Development:** I build websites that function correctly on any device and in all browsers, even when responsiveness isn't specified in the design.
- **CSS Grid and Flexbox:** Effective use of CSS Grid and Flexbox for creating flexible and responsive layouts.
- **CSS Preprocessors:** Proficient in SCSS and LESS for writing modular and scalable code, which simplifies maintenance and speeds up development processes.
- **Build Tools:** Experience with Gulp and Webpack for automating development processes, optimizing, and minifying code, which improves site performance.
- **CSS Frameworks:** Utilizing Tailwind CSS for fast and efficient UI development.
- **WordPress and PHP:** Confident in creating websites on WordPress, developing themes from scratch, customizing templates, and integrating functionality using PHP.

WORK EXPERIENCE

2022 - Present

Working on freelance platforms (Habr Freelance, K-work, Fiverr, Upwork). I am continuously learning through YouTube channels such as Web Academy, Traversy Media, ITDoctor, and others. I participate in live streams with web developers, coding alongside them. I actively keep up with the latest developments and news in web development and maintain a LinkedIn page to exchange knowledge with colleagues.

TOOLS

Skills:

HTML, CSS, SCSS, LESS, JavaScript, Gulp, Webpack, Git, Tailwind, WordPress. Currently, I am actively studying Vue.js.

IDE: Visual Studio Code.

Design Tools: Figma, Photoshop, Canva.

Other Tools: OpenAI.
