ABOUT ME

Date of Birth. 14.06.1996

I'm web developer, and I am ready to explore job opportunities. At the moment, I have enough knowledge to contribute to projects and continue to develop. My skill in selfdirected research and practical application makes me adaptable and eager to learn in the fast-evolving field of web development. My skills:

- Proficient understanding of HTML and CSS, including knowledge of HTML semantics, BEM methodology, and CSS styles.
- Proficiency in working with CSS Grid and Flexbox layout elements.
- Experience in creating responsive, cross-browser web pages.
- Knowledge of CSS preprocessors.
- Experience with build tools.

My goal is to continue my professional growth in this field. In the future, I aim to advance in front-end development.

WORK EXPERIENCE

I have gained knowledge and experience in web development through various methods:

- Online courses: I have completed video lessons and self-test assignments from ItProger.
- Practice on online simulators: W3Schoolas, BitDegree.org
- Learning from YouTube channels: Web Academy, Lifetime Freelancer, Traversy Media, ITDoctor, Simple: Development, Dev Ed, Web Developer Blog, and others.
- I watched live streams of experienced web developers working and wrote code alongside them.
- Additionally, I have freelance experience in developing responsive HTML/CSS pages for clients.

WORKED WITH

HTML, CSS, SASS, SCSS, LESS, JavaScript(basic) Gulp, Webpack, Git, Tailwind, Bootstrap.
IDE: Visual Studio Code.
Design tools: Figma, Photoshop, Canva.
Other tools: OpenAI.
